

Press Release

Brand new! The HEINE S-Frame® – The Perfect Fit.

At long last there is a frame that always fits: the HEINE S-Frame® for HR, HRP and HR-C binocular loupes can be individually set to suit practically any anatomy, providing a perfect fit for any shape of head and face. The result is an optimum fit – and due to the high-tech materials such as carbon, Kynetium®, titanium, magnesium and silicon – incredible strength and low weight. And it is precisely its low weight that makes the S-Frame so comfortable to wear, especially for longer treatments: no pressure points, slipping or pinching.

This applies to the HEINE S-Guard® splash guard as well: optimally adapted in combination with Professional L and Lightweight headbands, the S-Guard splash protection always ensures the optimum adjustment and position of the binocular loupe.

The HEINE S-Frame® and HEINE S-Guard®:
a powerful pair!
